

TAR & GLUE REMOVER

CHRISTEYNS

PROFESSIONAL HYGIENE

SOLVENT BASED TAR AND GLUE REMOVER

- Fast acting - saves time
- Removes road tar and bitumen
- Removes glue residue from window frames

USES

A ready-to-use thin liquid based on a blend of solvents for the removal of tar and glue from all surfaces that are not solvent sensitive. Tar & Glue Remover is not water-soluble.

Ideal to remove tar, bitumen and most solvent-based glue and stains from any solvent resistant surface.

Tar & Glue Remover is commonly used for cleaning road tar and bitumen from vehicle surfaces and removing glue residue from glass windows and PVC door or window frames. Tar & Glue Remover will remove residues of solvent based carpet tile adhesive.

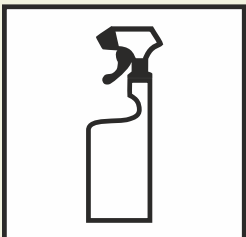

Tar & Glue Remover is suitable for use on glass, UPVC, metal, wood, marble, terrazzo, ceramics and concrete.

DIRECTIONS

Apply undiluted to the surface with a cloth or solvent resistant wipe, ensuring that the area of soiling is fully soaked.

Alternatively, decant Tar & Glue Remover undiluted into a solvent resistant trigger spray. Adjust the nozzle to give a course mist. Spray onto the soiled surface until the area of soiling is fully soaked. Allow a few moments contact time, agitate if required and wipe away.

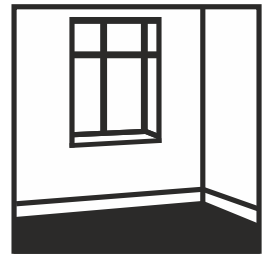

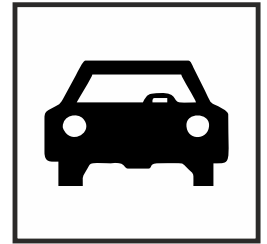

N.B. Always test surface compatibility prior to use. Only work on small areas at a time. Do not smoke.

DILUTIONS

Use undiluted.
