

ULTRAFRESH

BACTERICIDAL TOILET AND WASHROOM CLEANER

For a fresh, hygienic washroom environment, Ultrafresh is the ideal regular cleaner, combining effective multi-surface cleaning with a fresh, long-lasting fragrance.

Long-lasting fragrance

Ultrafresh boasts a high impact pine fragrance which leaves washrooms smelling fresh and fragrant for longer. This popular fragrance was created in response to a demand from contract cleaners for a washroom product *'that can be left in the toilet overnight, so that people entering washrooms in the morning will be welcomed with a pleasant 'recently cleaned' fragrance'*, indicating that the cleaners are doing their job to a high standard.

Effective cleaning action

Ultrafresh is a viscous green liquid that clings to surfaces for prolonged contact time to ensure a thorough cleaning and disinfecting action. It removes dirt, body fats and soap scum and, with regular use, prevents the build up of scale to maintain clean conditions.

Kills bacteria

Used neat or diluted with up to 50 parts water, Ultrafresh is effective against all bacteria and passes BS EN 1276:1997 with a 5 minute contact time.

Safe on all surfaces

Ultrafresh is non-acidic and non-abrasive, and is therefore ideal for cleaning all washroom surfaces including sinks, taps, baths, fixtures and fittings, walls, doors, tiled or ceramic floors, toilets, bidets and urinals. It is safe for use on stainless steel, chrome, laminate, plastic, ceramic, glass, paintwork, marble and all water washable surfaces.

Ultrafresh is available in 5L, 1L or 500ml pack sizes
