ENVIRONMENTAL & SOCIAL POLICY

At Vectair we take our environmental and social responsibility seriously.

We are dedicated in our quest to design ethical, efficient, environmentally friendly and economically viable products.

All products are fully compliant with relevant EC Directives. Regular reviews and updates of our international policies and procedures ensure that we are not only fully compliant with worldwide government legislation, but go beyond the necessary standards required.

ABOUT VECTAIR

ABOUT VECTAIR SYSTEMS LTD

We are a privately owned UK manufacturer of “away from home” commercial hygiene products.

Established in 1988, Vectair now distributes to over 120 countries worldwide from our European Head Office in Basingstoke, Hampshire, UK.

In 2007 we opened Vectair Systems Inc. with Headquarters in Memphis, Tennessee to service the North American Market.

Vectair manufacture a world class range of co-ordinated dispensers and consumables for the washroom, including automatic air fresheners and toilet cleaning systems, air purifying machines, hand washing dispensers, feminine hygiene products and baby changing stations.

"We are technological innovators in the hygiene world. We take pride in the quality and design that is invested in our products. We want to make your lives easier, with systems that work for you. And we want to make sure that they last."

Paul Wonnacott
Managing Director & President

**ENVIRONMENTALLY
FRIENDLY**

V-AIR® SOLID

Multi-Phasing Fragrance Technology

V-Air® SOLID is a unique and effective multi-phasing, passive air freshener with sub-micron fragrance technology.

VOC exempt

V-Air® SOLID is completely free of any solvents, propellants, HFCs and harmful volatile organic compounds (VOCs).

No batteries required

All it needs to work is natural airflow.

The refill is 100% organic and biodegradable and the dispenser is 100% recyclable.

Sub-micron technology

V-Air® SOLID particles enable superior fragrance delivery, yet are sized typically below 1.0 micron. This means they are much smaller and lighter than the particles in other fragrance systems, remaining airborne for many hours.

Multi-phasing

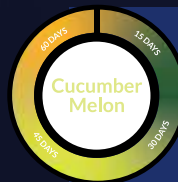

The V-Air® SOLID ceramic capsule is infused with high quality perfumes, then complemented by an integrated internal fragrance core. These combine and diffuse powerful key fragrance notes that are subtly different.

Just three parts

The technology behind V-Air® SOLID is packed into one powerful refill component, so we've done the hard work for you – no fuss, just fragrance. A fully recyclable retaining clip attaches the refill to the dispenser.

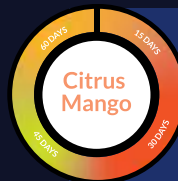

No liquids

V-Air® SOLID contains no liquids so won't spill, even if it is knocked over.

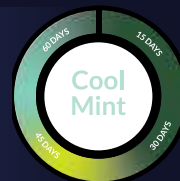

A heavenly mix of sweet and subtle. A fresh crush of cucumber leads into a calming melon, which drifts into an uplifting peach.

Your senses embark on an indulgent journey of taut apple, leading into spicy rich aromas of clove, cinnamon and nutmeg, with a touch of velvety vanilla.

This fruity cocktail starts with a burst of fresh citrus peel and juicy berries, opening the way to a lively lime with vanilla ice cream, and departing with a punch of peach and mango musk.

Beginning with crisp cedar and pine, the fragrance evolves into a cooling herbal aroma, transforming into a sparkling blend of energizing wild mint and eucalyptus, with a touch of lemon spearmint.

Opening with a mixture of clove, jasmine and lemon peel, this floral blend blossoms into a wave of soapy, cool marine musk.

COMPLETE
CUSTOMISATION

AIROMA®

The professionals choice

HARNESSING NATURE'S POWER

PROZONE®

Automatic Ozone Generator

Prozone® ozone generator cleans and rejuvenates the air we breathe, refreshing the atmosphere and bringing outdoor freshness indoors.

In nature, ozone is produced by the action of high energy discharges in lightning on oxygen within the atmosphere. Prozone® recreates this natural process.

The ozone produced destroys harmful micro-organisms and breaks down malodour-causing compounds, therefore neutralising the unpleasant smells they produce.

Pack size	1 x unit per pack

OMNISCENT®

Large Space Fragrance Refills

Unlike conventional aerosol fragrance systems, Omniscent® uses a solid ceramic block as the fragrance source.

The disposable block is gently heated within the unit and the fragrance is dispersed via an internal fan.

This gives large, uniform fragrance coverage from a single unit without the use of aerosols.

The range of Omniscent® fragrances are extensive and derived from wood, fruit, spices and flowers. Each fragrance block is 100% biodegradable. Bespoke and specific fragrances can be recreated when required.

MVP RANGE

Exclusive co-ordinated "family" of products

The MVP range is a stylish, contemporary and luxurious new range of dispensers designed to complement the most exclusive of washrooms. Fully co-ordinated, the range is available in white, white and chrome or black and chrome, made possible by an elegant insert on the front cover.

Currently available in this new range is our: Airoma® MVP dispenser, Micro Airoma® MVP dispenser, Quadrasan® MVP dispenser, Sanitex® MVP surface cleaner, Sanitex® MVP soap dispenser, V-Air® SOLID dispenser and the VIBE® aircare dispenser (with piezo technology).

**SAVES WATER.
SAVES MONEY.**

SENSAFLUSH®

Urinal Flush Management System

Sensaflush® is a unique urinal flush management system designed to drastically reduce water consumption by eliminating unnecessary and expensive wastage.

The Sensaflush® system is incorporated into the water supply to the urinal cistern and controls flush frequency by only allowing flushing when a user is detected.

If detection does not occur within a pre-selected period, Sensaflush® automatically provides a sanitising flush.

How can I save money by installing a Sensaflush® unit?

With Sensaflush® you have the ability to match your washroom requirements without compromising on the hygiene standards of the facility.

You can actually save up to 85% of water as you are only using water when it is needed – saving the water that would usually be wasted.

	Unmanaged	Urinal with sensaflush®
Litres per hour	60	15***
Hours per day	24	8
Days per week	7	5
Weeks per year	52	52
Litres per year	524,160	38,22
COST PER YEAR	£1189.84**	£148.73

SAVING OF £1041.11 PER YEAR

* On a 15 litre tank

** Based on an average UK water cost of £2.27 per m³

*** This can be reduced further when setting up Sensaflush® unit.

A photograph of two white ceramic urinals mounted on a wall of large, light-colored square tiles. A metal pipe runs horizontally above the urinals, connecting them to a central supply. The urinals have white plastic flush valves at the bottom. A semi-transparent blue rectangular box is overlaid on the right side of the image, containing the text 'CONTINUOUS MAINTENANCE' in white, bold, sans-serif capital letters.

CONTINUOUS MAINTENANCE

QUADRASAN® BREAKDOWN

Combination Cleaner

Quadrasan® Breakdown safe combination cleaner will remove both nasty odours and organic staining from a multitude of surfaces in commercial, institutional and domestic environments.

Quadrasan® Breakdown uses safe bacteria to degrade organic waste that may be the source of odours. When activated with water the micro-organisms in this dilutable liquid produce three key enzymes that degrade fats, proteins and starch and are highly effective in removal of oils, grease, food and human waste.

QUA-QBD

Quadrasan® Breakdown Combination Cleaner

QUADRASAN® PURGE

Urinal Trap Treatment

When outlet pipes in urinals and shower cubicles block with organic debris it causes the waste to drain away very slowly, which provides the perfect environment for bacteria to breed and cause persistent bad smells.

Cleaning these drains can be a difficult, expensive and time consuming activity. Quadrasan® Purge's powerful formulation breaks down the surface of organic waste before releasing enzymes which eat through the waste, therefore reopening the pipe.

Using Quadrasan® Purge is simple - place the sachet into the affected urinal bowl or shower drain, pour on 500ml of water to dissolve the sachet and leave for 15 minutes.

Rinse away after treatment, you will see immediate improvements.

Pack size: 24 x sachets per case.

QUA-QPU

Quadrasan® Purge Urinal Trap Treatment

PRODUCT SPECIFICATION

Method	Product can be applied using a cloth, mop or trigger spray
Pack size	2 x 5 litres per case (4 trigger spray labels included)
